I Build Fast, Revenue-Focused Web Apps for Startups | MERN Stack | React. Next.js. | Node.js | MongoDB
Islāmābād, Pakistan

Summary

Most business websites look decent but don't convert. Slow load times. No clear message. Visitors leave. I fix that. I build fast, clean, conversion-focused web apps for startups and small businesses using the MERN Stack. What I can build for you: → Landing Pages that convert visitors into leads → Full Stack Web Apps (React + Node + MongoDB) → E-commerce Stores → Admin Dashboards Why clients work with me: → Clean code — no bloat → Mobile-first, always → Direct communication → On-time delivery DM me "BUILD" and let's talk.

Experience

Freelance | Self-Employed
Full Stack Engineer

Web Development Instructor Academy
Human Resources Facilitator
July 2025 - October 2025 (4 months)

Taught front-end fundamentals (HTML, CSS, JavaScript) to live classrooms, breaking down complex technical concepts into practical, actionable lessons. Mentored students through hands-on coding exercises, rigorous code reviews, and live debugging sessions, directly improving their ability to build functional web pages.

Education

Virtual University of Pakistan
Bachelor's Degree, Computer Software Engineering · (April 2025 - May 2029)
